- Microsoft- Career Essentials in Generative AI
- Great Learning- Java Programming
- Kaggle-Introduction to Advance Java
- HackerRank- SQL basic, SQL intermediate
- Udemy-AWS- introduction to cloud computing

## PROFILE

Passionate Java Full Stack Developer eager to leverage software development skills and fintech knowledge to drive innovative solutions. Committed to continuous learning and collaboration to deliver high-quality applications.

## PROJECTS

### • SHOPPING WEBSITE (ECOMMERCE)

- TECHNOLOGY- Java (Spring-boot), React, Tailwind CSS, MySQL, GitHub.
- DESCRIPTION- I'm thrilled to showcase a recent learning project where I developed a full-stack eCommerce website from scratch. This project was a fantastic opportunity to dive deep into modern web development practices and integrate various technologies into a cohesive solution. This project integrates a complete flow from user authentication to order management.
- PROJECT LINK- [Click me](#)

### • ONLINE -FOOD ORDERING WEBSITE

- TECHNOLOGY- React, JavaScript, Boot-Strap, Java, Axios, MySQL.
- DESCRIPTION- Developed an online food ordering website that allows users to browse menus, customize orders, and securely process payments. The platform features a user-friendly interface, real-time order tracking, and seamless integration with delivery services, enhancing the overall dining experience. This project showcases my skills in web development and responsive design.

### • NEXTFLIX- Clone

- TECHNOLOGY- React, JavaScript, Boot-Strap
- DESCRIPTION- Created a Netflix clone using React, featuring a responsive interface for browsing movies and TV shows. The app includes user authentication, personalized watch lists, and real-time content loading, showcasing my front-end development skills and state management expertise.
